PAGE 3—Feature Data**Field Code South Meadow Twsp School#2SITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a rock and concrete foundation. The gable roof is partially covered with wood shakes with some metal capping and 1 finial. There is a stub of a chimney at the west end at the peak. The soffits are closed. The building measures 24 feet west to east and 18 feet north to south.

There is a wide trim board under the soffits at the peak ends. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. The east side has the outline of an entry, apparently it fell away and was removed. There are three double hung, three over one, windows on the south side with one covered and two uncovered and there is some glass. Three more similar windows on the north side are covered and there is some glass and framing. A broken 5 panel wood gives entry into the school room. The walls are lathe and plaster and much of that has fallen away. There are remnants of wainscot along the walls. The ceiling was beadboard and most of it is gone. The floor is tongue and groove hardwood. No blackboards remain.
