NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data

Field Code Champion Township SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete and rock basemnt. The intersecting gable roofs and the salt line extension on the entry are covered with wood shakes with metal capping and finials. The chimney is gone. The soffits are closed. There is a flagpole at the pead of the roof of the entry. The building measures 20 feet north to south and 28 feet east to west with the entry measuring 18 feet east to west and 8 feet north to south.

There is a wide trim board under the soffits at all the peak ends. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. There are attic vents at both the west and east ends. Concrete steps lead to a concrete stoop with pipe rails on either side. A broken 4 panel wood door leads into the entry, the walls are covered with beadboard. Above that door is a circular window hole without glass. There is one small double hung windows on the south side of the entry, another on the est side and this is where the toilets are. Another small window opening is on the west side of the entry, no glass. On the south wall of the school there is a double hung, no glass, window. There are three window openings on the west wall of the school and three more on the north side, all without glass and little framing. The walls are a mixture of lathe and plaster and wall board with much of it failing. There is wainscot throughout. The ceiling was finished with wallboard and huge chunks of that stuff are laying on the school room floor. Blackboards are on the east wall and some of these have been broken. The floor is tongue and groove hardwood. Wiring and light fixtures suggest electricity.
