**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Rainbow Township SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete basement. The intersecting gable roofs of the main body and the entry are covered with wood shakes. There is a yellow brick chimney at the west end of the roof peak. Two vents on the east slope of the entry indicate the location of toilets. The soffits are closed. The building measures 24 feet east to west and 28 feet north to south.

There is a wide trim board under the soffits on all peak ends. The remainder of the siding is 6 inch lap with 4 inch wood corner trim. A newer style door is propped up over the door opening, reached by concrete steps to a concrete stoop with pipe railings. The door is held to the building by a bungee cord. To the left of the door is a glass block window. On the right side of the door as well as the east side of the entry are two small, double hung windows that serve the toilets. Inside the entry, to the left, is the stairway to the basement. The walls of the entry are covered with beadboard. The toilets are to the right. Inside the main room of the school the floor is hardwood covered with tile. The walls are covered with lathe and plaster. The ceiling is finished with wallboard tiles. Two large, vented glass block windows are on the north wall and one is on the west wall. The blackboard is on the east wall. There is no wainscot. Light fixtures and exterior wiring suggest electricity.
