**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Judson Township SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The hip roof and dormer roof are all covered with wood shakes with metal capping. The west slope of the roof is extended eight feet to cover the entry and porch. The soffits are closed. There is a dormer on the west slope of the school and a west facing opening is boarded up. There is a stub of a red brick chimney to the north of the dormer on the west slope. The building measures 20 feet north to south and 30 feet east to west.

There is a wide trim board under the soffits on all side of the school. The remainder of the siding is 4 inch wood lap with 4 inch corner trim with waterboard and skirting board. A wood stoop with a missing support corner post leads to a 5 panel entry door. The entry has a covered window on the west wall. There are two double hung windows on the east side and a bank of 4 on the north side and all but one are covered. There is framing and some broken glass. The windows have decorative cornices both inside and out. The interior walls and ceiling are lathe and plaster with a wide trim board around the room at the floor. There is a picture rail all walls. The floor is wide tongue and groove pine. A blackboard covers the entire south wall. No sign of electricity.
