NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Mont Township SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete basement. The gable roof is covered with wood shakes with metal capping and finials. There is a broken red brick chimney at the peak of the north end. There are eaves troughs on the east side of the school. The soffits are closed. Attics vents are at the south and north side, under the peak. There are two vent pipes on the east slope of the roof toward the south end where the toilets are. The building measures 18 feet east to west and 34 feet north to south.

There is a wide trim board under the soffits at the peak ends of the school. The siding is 6 inch wood lap with 6 inch corner trim. There is a concrete stoop, reached by three steps, with a pipe railing at the south end of the school leading to a broken three panel wood door with a window at the top. The interior of the entry has wallboard on the walls and beadboard on the ceiling. There are two doors to the right leading into the toilets and a door straight ahead that leads into the school. There are two basement windows on the west side and one on the north. On the north end of the building there are two glass block windows. The east wall has two large vented glass block windows nearest the north end with two small, double hung windows for the bathrooms. Most of the glass is intact. The interior walls and ceiling are wallboard. There is a blackboard on the south wall to the west of the 5 panel wood entry door and another on about 1/3 of the west wall. Broken venetian blinds hang on the windows. The floor is narrow tongue and groove hardwood. Light fixtures and exterior wiring suggest electricity. The building is used for storage.
