**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Mission Ridge Twsp SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete basement. The intersecting gable roofs, the pyramidal roof of the bell tower and the shed roof are covered with wood shakes with metal capping and finials. A red brick chimney sits at the peak at the north end of the main body. The bell tower, on the entry peak, sits on a wood base and the next level is totally enclosed up to the pyramidal roof.

There is a wide trim board under the soffits at the peak ends of the school. The siding is 6 inch wood lap with 6 inch corner trim. There are basement windows on the south and east sides, some boarded shut. The entry has a salt box line roof that extends to cover an open porch with a support post at the southwest corner. The entry door is reached by 6 concrete steps to the concrete stoop. There is a 4 panel wood door sitting inside the school, removed from the hinges. The entry walls are covered with beadboard and the north half of the entry has one of the toilets and the other toilet is reached from inside the school room. There is one covered window on the west wall of the entry. On the north side of the entry is an addition for bathrooms with two double hung windows to the north, one is covered. There was a bank of windows on the east wall and all of them are gone and the area is boarded up. The floor is hardwood covered with tile. There is a blackboard on the south wall and the west wall from the door to the south wall. The walls and ceiling are wallboard. Most of the interior of the school is covered with graffiti. Light fixtures suggest electricity.
