**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code Barr Butte Township School #1SITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a foundation of rocks and mortar. The dutch gable roof of the school as well as the levels of the tower are covered with wood shakes. There is metal capping with finials at the peak of the roof. A red and yellow brick chimney sits on the west slope of the roof, near the peak. The bell tower, sitting on top of the wouthwest entry, has a tall base with sides sweeping up to the four support columns that hold a two part pyramidal roof. The underside of the two top pieces is finishe with ship lap. There is not bell. The soffits are closed. The building measures 20 feet east to west and 28 feet north to south. On the west side of the school there is a pile of lumber and lines on the school that could indicate another entry for the school.

There is a wide trim board under the soffits under the flat edges of the roof. The small area under the peak at each end has vertical shiplap siding. The remaining siding is 6 inch wood lap with 6 inch corner trim. There is a door opening on the west wall with a boarded up area above it that was likely a transom. There is another entry to the school on the southwest corner and there is a 5 panel broken wood door and yet one more 5 panel wood door, on an angled wall, for entry into the main room of the school. The entry has one covered windows on the east side. The school has two covered windows on the south side. There are two shuttered windows on the north side and 5 more on the east side and these windows are mostly covered and all have transoms above them, there is no glass. Decorative cornices are above doors and windows. The flooring is tongue and groove hardwood. The walls and ceiling are lathe and plaster with some beginning to fail. There is a picture rail on all walls. Blackboards in the building to either side of and between the windows on the north wall and on the entire west wall. At the south end of the building there is a storage area and perhaps coatroom. The building has grain on the floor and some of the windows have covering on the inside to hold grain.
