NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data

Field Code Orthell Township SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete basement that has been overlaid with stucco. The hip roof as well as the gable entry roof are covered with wood shakes and metal capping with finials. The soffits are closed with beadboard. The chimney is gone. The building measures 36 feet east to west and 20 feet north to south.

There is a wide trim board under the soffits on all four sides of the school and entry. The remaining siding is 6 inch wood lap with 6 inch corner trim to a waterboard and skirting board at the bottom. On the east side of the school, on the south side of the entry is a fuel door and the north side a window opening. On the west side basement level there are three multipane windows, on the north side two sets of two multipane windows and two more windows on the south side with one of these covered. There are two smaller, 6 pane fixed windows to either side of the entry. The south side has two sets of three large, multipane windows with some covered and much of the glass gone. Concrete steps lead to a concrete stoop and the broken 5 panel wood door. There is a window opening on the south side of the entry, no glass or framing. The entry leads into a large coat room with a door toward the north side leading to the basement stairway. Another door leads into the school room. The interior walls are wallboard with a wide trim board at the bottom. There is a picture rail on all walls. The ceiling is lathe and plaster. The floor is hardwood covered with tile. There are blackboards on the entire north wall of the school room and on the entry wall between the door and a built in cupboard. Globe light fixtures and wiring suggest electricity.
