NDCRS ARCHITECTURAL SITE FORM

PAGE 3—Feature Data

Field Code

SITS# 32

Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school on a foundation of poured concrete foundation. This school was moved from Judson Township west of Williston. The hip roof is covered with asphalt shingles as it the dormer roof. The dormer is on the east facing slope of the roof and a window opening is boarded up. There is a concrete block chimney, with a stove pipe sticking out the top, to the north of the dormer. The soffits are closed with beadboard finish. The building measures 24 feet north to south and 30 feet east to west.

A frieze board runs under the eaves on all side of the school. The siding is 4 inch wood lap with 4 inch corner trim. There is a wood porch at the northeast corner of the school, tucked under the buildig roof. the north side of the porch has a railing with a cornerpost supporting the roof. Entry is through a 5 pane wood door which is kept locked when no one is around. There is one small double hung window on the east wall, this lights up the entry/coatroom. There are four larger double hung windows on the north side as well as two more on the west side. All the windows have glass. The interior door is another 5 panel wood door. The interior of the school room is undergoing some renovation as they has water damage. The ceiiing and walls were lathe and plaster and they are replacing some of the damage with sheetrock. There is a plate rail in line with the tops of the windows. The window trim is dark and well kept. A wide mop board finishes the walls. There are blackboard along the entire south wall and it corners to the east wall over to the entry door. The chimney inside is to the right of the door as you walk into the room and just beyond that is a large cupboard. All other furnishings are in storage. The floor is tongue and groove fir. Light fixtures indicate electricity.

The school was built in 1914 and closed in 1950.
