1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school situated on a poured concrete basement. The hip roof has failing wood shakes with metal capping and finials. The chimney is gone. The soffits are open.

The siding begins with a rake board on all sides of the school. The remainder of the siding is 6 inch wood lap with metal corner trim. The door opening is half covered with a piece of plywood. Broken concrete steps lead to the door. The foundation shows lots of cracking. There are basement windows on the east, north and south sides. There are 6 over 6 double hung windows to either side of the entry door, no glass and some framing. Similar windows are located near the west end of both the north and south walls, likely located in the coatrooms. The north wall has four larger 6 over 6 double hung windows with all but one covered. Did not see the interior.
