**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Roan SchoolSITS# 32 GV**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The gable roof of the school of covered with ribbed sheeting and the shed roof will be covered with wood shakes. There is metal capping on the roof peak with finials. The soffits are closed. There is a yellow and red brick chimney at the peak of the roof near the south end. The building measures 34 feet north to south and 20 feet east to west.

There is a wide trim board on the wall under the soffits on the south side. The siding on the south, west and east is 6 inch wood lap with 6 inch wood corner trim. The north side of the building has metal sheeting. There is a door on the north side that was put in for access at this spot. The entry, with a 5 panel wood door, is at the south side of this building. The entry also has a window opening on both the east and west sides, covered. There are two double hung, two over two, windows on the east side with intact glass and two more on the west side and these are covered. There is a blackboard on the west wall between the windows. The walls in the school are covered with lathe and plaster, the ceiling a mixture of lathe and plaster and wallboard. The floor is hardwood with tile over it. The building is used for storage. Light fixtures suggest electricity.

This school was built in 1912 and operated until 1944, started out as Lundin School and when it was moved it became the Roan School.
